Availability of Documents

NASA Documents

The NASA documents listed in *Scientific and Technical Aerospace Reports (STAR)* are available from NASA without charge to:

- ★ NASA offices and NASA Centers
- ★ NASA contractors, subcontractors, grantees, and consultants
- ★ U.S. Government agencies and their contractors
- ★ Universities, colleges, and public libraries
- ★ Foreign governmental organizations and domestic or foreign private organizations which agree to:
  - —Exchange scientific and technical publications with NASA; or
  - —Maintain depositories of NASA publications for public reference.

Except for commercially available publications as noted in the Section below, this availability applies to those documents listed with an indication of either NASA origination or NASA support.

Request documents in *STAR* by:

- ★ Obtaining Form 492 (Document Request) from NASA, Office of Scientific and Technical Information.
- ★ Indicating on the form the NASA contract number or other identification of support, and also the NASA accession number (e.g., N63-12345).
- ★ Forwarding the form to:

National Aeronautics and Space Administration
Office of Scientific and Technical Information
Attn: Code AFSS-A
Washington, D.C., 20546

For persons or organizations not included in the above categories:

- ★ NASA documents may be purchased from the following addresses as specifically indicated in the abstract section:

Superintendent of Documents (GPO)
U.S. Government Printing Office
Washington, D.C., 20402

Office of Technical Services (OTS)
Department of Commerce
Washington, D.C., 20230

- ★ NASA documents are available for reference purposes at the organizations listed on the inside back cover.

Non-NASA Documents

NASA will continue to provide British, Canadian, and AGARD reports. All other documents listed that are not NASA generated or supported are available from NASA only to:

- ★ NASA Offices and Centers
- ★ NASA contractors, subcontractors, grantees, and consultants.

All other activities and individuals should request them from the source or information services which normally fill their document requirements such as Office of Technical Services and Defense Documentation Center for Scientific and Technical Information.

Commercially Available Publications

Priced publications, listed in *STAR*, but for sale by commercial publishing firms, colleges, university presses, professional societies and institutes, should be obtained from the source, from bookdealers, or from libraries. Journal articles reporting NASA or NASA-supported work are announced and indexed in *STAR* primarily for reference purposes.

HOW TO OBTAIN *STAR*

The semimonthly issues of *Scientific and Technical Aerospace Reports* and the cumulative index issues are available without charge to all activities supported by the National Aeronautics and Space Administration, including NASA contractors, subcontractors, grantees, and consultants, and to other government agencies. They are available from NASA without charge on an exchange basis to universities, professional societies, and industrial and independent research organizations. Inquiries on availability may be directed to the National Aeronautics and Space Administration, Office of Scientific and Technical Information, Code AFSS-A, Washington, D.C., 20546, United States of America.

The semimonthly issues and the cumulative index issues are available postpaid on subscription and in single copy from the Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues. Annual subscription rate: $25.00, domestic; $31.00, foreign. Price per single copy: $1.50, domestic; 25¢ extra for foreign mailing.
Cumulative index issues. Annual subscription rate: $30.00, domestic; $34.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.
Foreign subscription rates apply to Argentina, Brazil, British and French Guiana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

Introduction

This publication contains the annual cumulation of the Subject, Corporate Source, Personal Author, Report Number and Accession Number Indexes for *Scientific and Technical Aerospace Reports (STAR)*, Volume 1, Numbers 1 through 24. The accession number is the identification given by NASA to each item indexed in the year indicated (e.g., N63-12345).

The annual index is divided into four separately bound sections. Sections I and II contain the Subject Index, Section III contains the Corporate Source, Report/Accession Number, and Accession/Report Number Indexes, and Section IV contains the Personal Author Index.

In using the indexes, it is necessary to note both the accession number and the issue and category number by which a desired citation may be found. Introductory notes at the beginning of each index describe their characteristics and use in greater detail.

The annual index for *STAR*, Volume 1, Numbers 1–24 supercedes all previous indexes in this volume year.

Information regarding the publication and availability of *Scientific and Technical Aerospace Reports* may be obtained from the National Aeronautics and Space Administration, Office of Scientific and Technical Information, Washington, D.C., 20546.

CORPORATE SOURCE INDEX

Listing of Reports by Corporate Source

Proceedings of meetings, symposia, etc., are included if their sources are known. A Notation of Content, *rather than the title of the document*, appears under each corporate source. The NASA accession number is located under and to the right of the Notation of Contents (e.g., N63-12345), followed by a category number (e.g., 13-02) for locating the abstract in the first section. The first two digits of the category number identify the issue number of *Scientific and Technical Aerospace Reports*, and the two digits following the hyphen identify the category as listed in the Table of Contents.

REPORT/ACCESSION NUMBER INDEX

Listing of Report Numbers

To the right of each report number is the NASA accession number followed by a four digit number for locating the abstract. The first two digits identify the specific issue of *STAR*, and the two digits after the hyphen identify the subject category in that issue under which the abstract appears.

ACCESSION/REPORT NUMBER INDEX

Listing of Accession Numbers

This list of accession numbers may be used to locate the *STAR* issue and subject category in which a specific abstract appears, as well as to identify the accessioned report. Accession numbers are arranged in ascending order, followed by a four digit number for locating the abstract. The first two digits identify the specific issue of *STAR*, and the two digits after the hyphen identify the subject category in that issue under which the abstract appears. Report numbers are given for cross-reference purposes at the right side of each column.
